

More power to you.

## Catalyst Power & Gas LLC

### January 2026

## Delaware Environmental Disclosure Label

Electric suppliers are required to provide customers with environmental disclosure labels. The label enables customers to look at the energy sources, air emissions, and information about the supplier's company in order to make a more informed choice of a power supplier. Based on the most current data available at the time of filing, please see the environmental information for electricity offered by Catalyst Power & Gas LLC below.

### ELECTRICITY FACTS

The following distribution of energy resources was used to produce electricity for the Delaware load in the PJM Region from 12/2024 to 11/2025.

Coal	16.40%
Oil	0.31%
Natural Gas	43.03%
Nuclear	31.56%
Other	0.60%
<b>Renewables</b>	<b>8.10%</b>
<hr/>	
<b>Total</b>	<b>100%</b>

(Actual total may vary slightly from 100% due to rounding)

*\* Renewables includes energy sources defined as "Eligible Energy Resources" by the Delaware Administrative Code, Title 26: Section 3000*

### AIR EMISSIONS

Average Nitrogen Oxides (NO<sub>x</sub>), Sulfur Dioxide (SO<sub>2</sub>), and Carbon Dioxide (CO<sub>2</sub>) emissions associated with the PJM System Mix.

Emission Type	Lbs. per MWh
Nitrogen Oxides (NO <sub>x</sub> )	0.28
Sulfur Dioxide (SO <sub>2</sub> )	0.35
Carbon Dioxide (CO <sub>2</sub> )	768.479

The PJM system mix represents all resources used for electricity generation in the region. Park Power, LLC purchases power from the PJM system mix.

CO<sub>2</sub> is a "greenhouse gas" which may contribute to global climate change. SO<sub>2</sub> and NO<sub>x</sub> released into the atmosphere react to form acid rain. Nitrogen Oxides also react to form ground level ozone, an unhealthy component of "smog."
