catalyst power
More power to you.

Catalyst Power & Gas LLC
October 2026
Delaware Environmental Disclosure Label

Electric suppliers are required to provide customers with environmental disclosure labels. The label enables customers to look at the energy sources, air emissions, and information about the supplier's company in order to make a more informed choice of a power supplier. Based on the most current data available at the time of filing, please see the environmental information for electricity offered by Catalyst Power & Gas LLC below.

ELECTRICITY FACTS

The following distribution of energy resources was used to produce electricity for the Delaware load in the PJM Region from 09/2025 to 08/2026.

Coal	16.20%
Oil	0.41%
Natural Gas	43.29%
Nuclear	31.16%
Other	0.55%
Renewables	8.39%
Total	100%

(Actual total may vary slightly from 100% due to rounding)

** Renewables includes energy sources defined as "Eligible Energy Resources" by the Delaware Administrative Code, Title 26: Section 3000*

AIR EMISSIONS

Average Nitrogen Oxides (NO_x), Sulfur Dioxide (SO_2), and Carbon Dioxide (CO_2) emissions associated with the PJM System Mix.

Emission Type	**Lbs. per MWh**
Nitrogen Oxides (NO_x)	0.30
Sulfur Dioxide (SO_2)	0.36
Carbon Dioxide (CO_2)	766.42

The PJM system mix represents all resources used for electricity generation in the region. Catalyst Power & Gas LLC purchases power from the PJM system mix.

CO_2 is a "greenhouse gas" which may contribute to global climate change. SO_2 and NO_x released into the atmosphere react to form acid rain. Nitrogen Oxides also react to form ground level ozone, an unhealthful component of "smog."
