More power to you.

Catalyst Power & Gas LLC

June 2026 Environmental Disclosure Statement

Power plants can generate electricity from several different fuel sources, resulting in different emissions. Catalyst Power & Gas LLC will report fuel sources and emissions data to customers twice annually, allowing customers to compare data with other suppliers providing electric service in Maryland.

Sources of Electricity Table

Sources of Electricity Supplied from April 2025 to March 2026	**Percentage of Total**
Coal	16.46 %
Natural Gas	43.35 %
Nuclear	31.22 %
Oil	0.38 %
Hydroelectric	0.81 %
Solar	2.95 %
Biomass	0.60 %
Wind Power	3.66 %
Other Resources	0.58 %
Total	**100.00 %**
The data reflects Catalyst Power & Gas LLC's Product Offering. The sum of the individual fuel sources may not equal 100% due to rounding.	

Air Emissions

Lbs./MWh Nitrogen Oxides (NO_X), Sulfur Dioxide (SO_2), and Carbon Dioxide (CO_2) emitted from April 2025 to March 2026	
Carbon Dioxide	774.42
Nitrogen Oxide	0.293
Sulfur Dioxide	0.357
Carbon Dioxide (CO_2) is a "greenhouse gas" which may contribute to global climate change. Sulfur Dioxide (SO_2) and Nitrogen Oxides (NO_X) released into the atmosphere react to form acid rain. Nitrogen Oxides also react to form ground level ozone, an unhealthful component of "smog."	

This disclosure is required by the Maryland Public Service Commission.
